DESIGNER / ESTIMATOR POWER DISTRIBUTION ENGINEERING / OVERHEAD LINESMAN

Hands-on approach with good line management experience in organising multi-skilled, multi-utility workers and materials within the power distribution and pipeline services including water, gas and fibre optics mostly within excavating and building services. Accomplished in overseeing and controlling tasks and projects from conception through to completion. Abilities in technical analysis, estimating testing, developing and finding solutions to complex customer requirements. Now seeking a challenging role in the overseas oil, gas or pipeline industries.

AREAS OF EXPERTISE

- Operating HV and LV systems
- Overhead lines
- Tender analysis
- Underground cabling systems
- Identifying customer needs
- Power Systems Protection
- Ferranti Tele-control systems
- Design and Specification (3D CAD)
- Contract management
- Fault location
- Review of drawings
- Quality Work Group Leadership
- Supervision
- Estimating / costing
- Client liaison
- Replacement programmes
- Final handovers
- Quality Facilitator

PROFESSIONAL EXPERIENCE & SIGNIFICANT ACHIEVEMENTS

DESIGNER / ESTIMATOR

2002 - 08

Write Company A Here

Strategic and technical design of electrical power supplies for loads up to 60kVA. Providing a professional and cost effective power distribution system to meet your present and future requirements, optimising customers investment.

- Installation of new power supplies up to 60KVA. Working independently over the whole N.E. Region, from North. Yorkshire to Scottish Borders. Very often working around the U.K. Large amounts of paperwork involved.
- Clients include most major companies such as Barrett's, oneZone / T mobile.
- Overseeing the Civils part of operations.
- Ensuring all safety precautions are undertaken.
- Examine design specifications, working out the most effective and economical means of constructing power supplies. Liaised with managers and clients.
- Negotiation of wayleaves with landowners, together with damage assessment and settlement.
- Using the latest computerised equipment ensuring accuracy of output and the capability of achieving an optimum solution.
- Using Computer Aided Design Systems - provision of detailed electrical and civil drawings for projects ranging from overhead line construction to substation installation.

SUPERVISOR

1998 - 02

Write Company B Here

Responsibility for construction projects from authorisation through to completion, including co-ordination and sourcing of materials, manpower and budgets. Supervising sub-contract staff.

- Overseeing the Civils part of operations.
 - Overseeing the installation of new HV and LV underground infrastructure
 - Recording all system operations.
 - Overseeing all groundworks including reinstatement.
 - Issue and cancellations of safety documentation.
-

PROFESSIONAL EXPERIENCE AND ACHIEVEMENTS (CONTINUED)

Client List includes:

North Yorkshire County Council, Mott Ewbank Preece, York Waterworks, Bowey Construction, Newcastle International Airport, Durham University, Northumbrian Water, Freeman Hospital, Hydro Polymers, McKechnie Plastics, Persimmon Homes, Scottish Hydro-Electric, HM Prison Acklington, McCains Potato Store, Strathclyde, Regional Council, Price Waterhouse, Mattel Fisher Price, British Steel, Cleveland Potash, Eastern Electricity, Hashimoto, Interconnection Systems, Northern Ireland Electricity, Rolls Royce IPG, Fasson UK, Phillips Petroleum, John Edwards Architects, Clugston Construction, Amec.

OVERHEAD LINESMAN

1995 - 98

Write Company C Here

Turned troubled jobs around and satisfied clients requirements, improving quality service whilst reducing costs by identifying problems to BS5750 quality standards.

- Connection of Supplies new houses around the U.K.
- Connection of Supplies to large and small businesses around the U.K
- Increased load capacities for homes and businesses
- Refurbishment of high voltage overhead lines, underground cabling systems and replacement programmes.
- Dismantling of redundant overhead line networks.
- Consistently met deadlines within budgeted parameters.

DRIVER / FITTER

1988 - 95

Write Company D Here

- Driving within the UK - construction part of industry.
- Collection and delivery of materials and apparatus to site.
- Built new sub stations.
- Installed transformers, switchgear, and LV panels.
- Constructed overhead lines.
- installed new HV and LV underground infrastructure(cables)
- Dismantled redundant sub stations
- Dismantled HV and LV overhead networks

MAINTENANCE ENGINEER

1984 -88

Write Company E Here

- Worked on continuous improvement projects mainly within Unit Machining and CNC machines.
- Provision of various technical support for PLC controlled pneumatic and hydraulic processes.
- Controlled contract services, maintenance and refurbishments.

MECHANICAL FITTER (YTS)

1983 - 84

Write Company F Here

- Restored Beamish Museum vehicles.

Various courses: Power Systems Protection, Quality Work Group Leadership, Quality Facilitator, Lorry Mounted Crane, Safety Handling, 1st Aid, Health and Safety, 3D CAD, Customer Handling, Overhead Linesman Basic Sea Survival. Coastal skipper (theory and practical)

Driving: HGV 1, FLT, full driving licence.

Interests/pastimes: Coastal / Charter Skipper (Licensed up to 60 miles), football, social.

Personal: Born 67. Married, 3 children.
