### WEBSITE PROJECT CO-ORDINATOR / UAT TESTER

*Apr 07 - Jan 08*

*Company A*

Responsible for coordinating this exciting web-based project and content management system: designed and implemented a new user interactive public site where customers can track parcels and lodge complaints on-line. Ensuring the project meets detailed project documentation, business and functional specifications.

- **Worked with business and IT teams and created Test Strategies:** Liaised with development staff and business analysts and gained an in-depth understanding of the website to be tested. Attended reviews and inspections of requirements created by business analysts. Defined a checklist of testing processes.
  - Helped with data mapping the old system to the new system (data migration).
  - **Testing:** Creating and executing test scripts and logged defects with Mercury Quality Centre Suite.
  - Tracking and reporting defects using Test Director.
  - Performing system, usability and acceptance testing at all levels of project development.
  - Recording and running business processes that emulates would be users' actions.
  - Creating checkpoints to verify that expected information is displayed in the web application while the test is running. This includes, but not limited to Text, Image, Page, Accessibility and Table Checkpoints.
  - Defining data table parameters and running tests to check how the website performs.
-

---

## PREVIOUS PROJECT MANAGEMENT EXPERIENCE / ACHIEVEMENTS

- **Testing (cont):** Emulating different users' behaviours including browser emulation, think time, speed simulation etc.
- Comparing performance data against the SLAs and defining SLA statuses for the defined measurement.
- Producing test reports within strict timescales.
- Carrying out Regression Testing, ensuring fixed bugs didn't break the site or reinstate previously fixed bugs.
- Documenting details of discovered bugs and their resolutions or workarounds.
- Defining exit criteria using project methodology and management approaches such as V-MODEL and ITIL.

### PROJECT / TEAM MANAGER
